

Word Problems

Below are some links to recommended books, software and tools to practice number bonds for addition and subtraction.

There are a number of wonderful resources for developing story and word problems, and learning to solve them, with children.

- [*Math Talk*](#) by Char Forsten and Torri Richards: A resource book that helps students develop math stories from simple understanding of numbers and counting to more complex.
- [Thinking Blocks](#), a free resource to model and solve a wide variety of word problems online.
- [This website](#) has math application problems from Eureka Math.
- [Youcubed](#) has challenging and interesting tasks.
- In the [Achieve the Core Coherence Map](#), many of the standards have aligned Illustrative Mathematics tasks.
- My book, [*The Art of Learning Math: A Manual for Success*](#), has a chapter on problem solving with useful approaches.
